

High Quality - Cheng-Ho 1/10 Roller Bag

HARD

HARD9031 - Cheng-Ho Roller Bag

The main purpose of the H.A.R.D. Car Bags is to improve carrying abilities of R/C equipment from one event to the next. Of the three categories manufactured, there will be several different sizes available. Which ever option you choose, there will be a bag available in your size and in your style.

Let's take a closer look at the main features of the Cheng-Ho Series 1/10 Touring Car Bag:

Quality Materials Means Quality Craftsmanship.

The stylish and cool H.A.R.D. colours of grey and green really give these new bags a fantastic clean look. Not only do they look good but they feel good, too. This is a result of careful selection of several materials used during construction. By being selective, we not only helped to improve looks but also functionality as well. For example, the material used for the majority of the bag is Styrofoam. Its main advantages are its incredible strength and durability while also offering another neat benefit of being completely washable.

There are two hard wearing rubber feet which are shaped to provide additional grip on slippery surfaces. The wheels on the bag are made from a heavy duty plastic that was selected due to its low wear rate. The wheels also feature a treaded pattern, again giving its owner additional grip when needed.

HARD9031 Cheng-Ho 1/10 Roller Bag

User-friendly handles

Stylish Cheng-Ho Series label

Side pocket ideal for items like setup gauges

Back pocket for setup board
